

- All works to be undertaken shall be in accordance with the Nottingham Highways Design Guide, NCC standard drawings/specifications and to the NCC Highways Inspector.
- Private drainage will be installed at the back of highway boundary to prevent surface water from private driveways and footways entering the public highway.
- If proprietary drainage products are to be used within the highway (i.e. no bespoke chambers or cover slabs), the Construction Products Regs (CPR) apply and the Contractor/Developer must provide a Declaration Of Performance and CE/Kitemark data for all the relevant products used to NCC.
- Compliance with CPR does not eliminate the need for a Certificate of Construction Compliance in accordance with CG 300 Appendix N, signed by the Contractor and the Independent Works Examiner.
- The Certificate of Construction Compliance shall be submitted for review and eventual countersignature upon completion of the works. Failure to complete this stage of the technical approval process will affect S38 adoption.
- Nottingham County Council may charge a fee for this process in addition to the S38 administration and inspection fee.
