Planning application number V/2025/0497 . my daughter actually works at the care home who's taking care of their father which they want to Land for so they can move him in because he need 24 hour medical attention. Read it some of the comments that that's on the application and I find it outrageous how some people gone out of their way so they don't have gypsies moving next-door, which I don't think is right anyway possible because nobody knows the family situation I understand why they want to extend the site because which I've spoke to the family that traveling community likes to live together so the plot is not big enough with one pitch for the family I don't understand. What's the big fuss It's already a gypsy traveler pitch. You've got our full support and I hope the family gets the good result at the end so our dad have some stable to go and get the medical attention he needs.
