Me and my daughter support plan application number V/2025/0497 come from a showground family myself. I understand where these people are coming from they need somewhere to live and nowadays with the house crisis it's very hard to get somewhere specially for a big family so I think it's only right that the council give them somewhere to stay, if not here put them somewhere where they can live with their family because it was already at gypsy site so extended it is not gonna make any noise or any excuse I see in the objections I've seen that you've put some static homes on there it doesn't look out of the place it looks much better than it used to look a couple years ago and I know how difficult it is for this because as I said, I come from a showground family myself which is mostly the same thing so we're all for this. Everyone need the roof over their head da don't do any harm to anybody. It's their own land. They're keeping at Montain they're the same as everybody else so they shouldn't be treated less than anybody else you've got our support
