Comment:

Comment: I am a resident living opposite the path leading to Orchard Road Primary School and the path leading to Church Street. This area is affected by traffic congestion especially during school drop-off and pick-up times. Increased traffic from proposed building of care facility will add to the inconvenience already experienced by residents. The road is used by school staff and staff from businesses on New Line Road to park during the day. Vehicles continually drive to this end of the road to turn and when unable to do this they reverse back between parked vehicles causing danger particularly to children leaving school. The site of the proposed building is on a bend in the road where drivers frequently have to give way to oncoming traffic or reverse which is extremely difficult.

The proposal is for construction of a C2 Care Facility for 4 children but I understand that the use of this building can be changed resulting in additional concerns for residents.

I strongly object to this proposal.
